

Sixth International Congress on Fluid Dynamics and Propulsion

(ICFDP 6)

December 29-31, 1996

Cairo, Egypt

CONTENTS

Page

VOLUME I

Session S-1: Computational Fluid Dynamics I 1

Sunday, December 29, 1996

Chairs: W. Habashi, M. M. Helal

A Mesh Optimizer for CFD

W. G. Habashi, and Y. Bourgault

Concordia University, CFD Lab, Montreal, Quebec, CANADA

M. Fortin

GIREF, Universite Laval, Ste-Foy, QC, CANADA

I. Dompierre

CRM Universite de Montreal, Succ. Centre Ville, Montreal, QC, CANADA

M. G. Vallet

Institute de Materiaux Industriels, Boucherville, QC, CANADA

1-8

A Finite Volume Method for the Two-Dimensional Euler Equations with Solution Adaptation on Unstructured Meshes

M. Ahmdi, and W. Ghaly

Concordia University, Montreal, Quebec, CANADA

9-18

A Loosely Coupled Approach for Equilibrium and Nonequilibrium Hypersonic Flows on Optimized Quadrilateral Meshes

D. Ait-Ali-Yahia, and W. G. Habashi

CFD Laboratory, Concordia University, Montreal, Quebec, CANADA

19-29

Vectorized Directional Sweep Based Parallelization Method for Factored Alternating Direction Implicit (ADI) Schemes

Y-D Jun, and A. Hamed

University of Cincinnati, Cincinnati, Ohio, USA

30-38

Numerical Calculation for the Torque Required to Rotate Two Concentric Spheres
R. R. Mossad
University of South Queensland, Toowoomba, AUSTRALIA 39-46

Session S-2: Two-Phase Flows 47

Sunday, December 29, 1996

Chairs: M. Ibrahim, A. Ogawa

On the Effect of the Solid Particles for the Tangential Velocity of the Dust Laden Gas Flow in the Cyclone Dust Collector
A. Ogawa
Nihon University, Kooriyama-shi, JAPAN 47-54

Experimental and Computational Investigations of Phase Change Thermal Energy Storage Canisters
M. Ibrahim, T. Kerlake, P. Sokolov, and C. Tolbert
Cleveland State University, Cleveland, Ohio, USA 55-64

Heat Transfer in Two-Phase Dilute Suspensions Flow in Pipes, Prediction for Turbulent Prandtl Number
S. A. Abdel-Moneim
Zagazig University, Zagazig, EGYPT 65-76

Flow Regimes and Drift-Flux Correlations for Gas-Liquid Flow in Large Diameter Vertical Pipes
S. M. Nada
Benha Higher Institute of Technology, Benha, Egypt
A. Abdul-Razzak
Atomic Energy of Canada, Mississauga, Ontario, CANADA
B. Stankovic, and M. Shoukri
McMaster University, Hamilton, Ontario, CANADA 77-85

A Stochastic Approach to the Dispersion during Two-Phase Flow through Porous Media
M. R. Slawomirski
Strata Mechanics Research Institute, Polish Academy of Sciences, Krakow, POLAND 86-94

Session S-3: Turbomachinery I 95

Sunday, December 29, 1996

Chairs: S. Mikhail, A. Rivir

Characteristics of Simulated Turbine Film Cooling Flows
R. B. Rivir, and S. P. Gogineni
Wright Laboratories, Wright Paterson Air Force Base, Ohio, USA 95-107

Experimental and Numerical Flow Investigations in a Gas Turbine Combustor
D. Bohn, K. Holzenthal, and C. Koester

Institute of Steam Gas Turbines, Aachen University of Technology, Aachen, GERMANY	108-117
Study of the Performance of a Small Supercharging Turbine <i>G. Descombes, Q. Duan, and J. O. Jullien</i> Laboratoire de Mecanique Physique, University Pierre et Marrie Curie, Saint Cyr L'Ecole, FRANCE	118-126
Analysis of the Location of the Stagnation Line on a Turbine Guide Vane with Shower-Head Cooling: Experimental and Theoretical Investigations <i>D. E. Bohn, V. J. Becker, and A. U. Rungen</i> Institute of Steam & Gas Turbines, Aachen University of Technology, Aachen, GERMANY	127-136
Comparison of Numerical Models Predicting the Flow through Hydraulic Machinery Bladings <i>R. Schilling, R. Bader, A. Fernández, and N. Riedel</i> Technical University of Munchen, Lehrstuhl und Laboratoriumfur Hydraulische, 80290 Munchen, GERMANY	137-145
Session S-4: Turbulent Flows I	146
Sunday, December 29, 1996 Chairs: M. Gad-el-Hak, M. F. Khalil	
Turbulence: The Taming of the Shrew <i>M. Gad-el-Hak</i> University of Notre Dame, Notre Dame, IN, USA	146-167
Mixing of the System Three-Dimensional Supersonic Relaxing Jet of N₂ and CO₂ <i>A. V. Lavrov, and T. A. Bungova</i> Russian Scientific Center, St-Petersburg, RUSSIA	168-178
The Solution of Unsteady Turbulent Flows by using the Splitting Technique and the Method of Characteristics <i>G. Hafez, A. Morgan, and S. Masoud</i> Ein Shams University, Cairo, EGYPT	179-195
Application of Neural Networks to Measurements of Simultaneous Quantities in Turbulent Flows <i>A. Soudani</i> Institute de Mechanique de Grenoble, FRANCE <i>R. Bessaih</i> Institute de Genie Mecanique, Université de Constantine, ALGERIA	196-200
Secondary Flow Effect on Turbulence Structure of a Flat Plate Wake <i>H. S. Kim, J. S. Lee, and S-H Kang</i> Seoul National University, Seoul, KOREA	201-208

Session S-5: Workshop I: Education and Industry

Sunday, December 29, 1996

PANELISTS:

H. E. Engineer *Solieman Reda* - Egyptian Minister of Industry & Mineral Resources

Prof. Dr. *F. Ismael* - Vice President of Cairo University, Egypt

Prof. *M. Ghausi* - Dean of Engineering, University of California at Davis

Prof. *M. Salkind* - President, Ohio Aerospace Institute, Ohio, USA

Prof. *M. Shoukri* - Dean of Engineering, McMaster University, Canada

Prof. *R. Mankbadi* - ASME Fellow Moderator

Session S-6: Turbomachinery II

209

Sunday, December 29, 1996

Chairs: J. Lepicovsky, M. Rautenberg

Modern Experimental Techniques in Turbine Engine Testing

J. Lepicovsky

NYMA, NASA Lewis Group, Ohio, USA

R. J. Bruckner, T. J. Bencic, and E. P. Braunscheidel

NASA Lewis Research Center, Cleveland, Ohio, USA

209-216

Flow Patterns during Stall and its Inception in a Centrifugal Compressor

J. Chen, and L. Shi

Institute of Engineering Thermophysics, Chinese Academy of Sciences, Beijing, CHINA

H. Hasemann, and M. Rautenberg

Institute of Turbomachinery, University of Hannover, Hannover, GERMANY

217-226

A Method of Performance Prediction of Turbocharging Centrifugal Compressors

J. A. Hammoud, M. Pluviouse, and M. Frelin

Laboratoire de Turbomachines, CNAM, Saint Cyr L'Ecole, FRANCE

227-236

Investigation of Asymmetric Vaned Diffusers in a Centrifugal Compressor

Z. Jiang, and Z. Shao

Institute of Thermomachinery, Tongji University, CHINA

U. Seidel, H. Hasemann, and M. Rautenberg

Institute of Turbomachinery, University of Hanover, Hanover, GERMANY

237-246

Stabilizing Shock Oscillation by Passive Control

S. Yu, T. Setoguchi, and H. J. Wang

Institute of Engineering Thermophysics, Chinese Academy of Sciences, Beijing, CHINA

247-251

Session S-7: Turbulent Flows II

252

Sunday, December 29, 1996

Chairs: R. C. Hendricks, I. Wygnanski

The Coherent Motions in a Forced Turbulent Shear Flows

<i>M. Zhou, and I. Wagnanski</i> The University of Arizona, Tucson, USA	252-257
Flows in Pinned Array Simulating Brush Seals <i>R. C. Hendricks, V. V. Kudriavtsev, M. J. Braun, and M. M. Athavale</i> NASA Lewis Research Center, Cleveland, Ohio, USA	258-266
Predictions of Turbulent Flows by Nonlinear First- and Second Moment Models <i>D. Lentini</i> Universitas degli Studi di Roma "La Sapienza", Via Eudossiana 18, Roma, ITALY	267-272
A Critical Evaluation of the Classical k-ϵ Model and Wall-Laws for the Flow over a Square Cylinder <i>B. Mohammadi, and G. Medic</i> INRIA, Domaine de Voluceau, Le Chesnay, FRANCE	273-280
Correlation of the Wall Skin-Friction and Streamwise Velocity Fluctuations in a Turbulent Boundary Layer <i>J. M. Yang, J. Y. Yoo, and H. Choi</i> Seoul National University, Seoul, KOREA	281-286

VOLUME II

Session S-8: Computational Fluid Dynamics II	287
Monday, December 30, 1996 Chairs: S. Abdallah, J. H. Saiaç	
Three-Dimensional Viscous Flow Simulations in Turbomachinery <i>A. Hamed</i> University of Cincinnati, Cincinnati, Ohio, USA <i>T. Liang, and J. J. Yeuan</i> Feng Chia University, Taichung, TAIWAN	287-295
Numerical Simulation of Incompressible Viscous Flow around an Elliptic Cylinder <i>Y. T. Chew, S. C. Luo, and T. Guo</i> The National University of Singapore, SINGAPORE	296-303
Numerical Solutions of Isothermal Flows by a Finite Element Method using Psi-Omega Formulation <i>J. H. Saiaç, and V. P. Mai</i> ESCPI, CNAM, Paris, FRANCE	304-315
Numerical Study of Steady Mixed Flow in Annuli of Rotating Cylinders by Multi-Split False Transient Method <i>T. S. Lee, and C. L. Soh</i> National University of Singapore, SINGAPORE	316-321

A Cycle-Independent Algorithm for Implicit Solution of the Navier-Stokes Equations

N. Ghizawi, and S. Abdallah

University of Cincinnati, Cincinnati, Ohio, USA

Y. T. Lee

David Taylor Model Basin Bethesda, Maryland, USA

322-331

Session S-9: Aeroacoustics I

332

Monday, December 30, 1996

Chairs: M. Y. Hussaini, C. Tam

Inhomogeneous Radiation Boundary Conditions Simulating Incoming Acoustic Waves for Computational Aeroacoustics

C. K. W. Tam, J. Fang, and K. A. Kurbatskii

Florida State University, Tallahassee, USA

332-339

A Time-Domain Numerical Method for Duct Acoustics

J. L. Manthey, and F. Q. Hu

Old Dominion University, Norfolk, VA, USA

M. Y. Hussaini

Florida State University, Tallahassee, Florida, USA

340-348

Control of Jet Noise via Excitation

H. S. Shih, D. R. Hixon, R. R. Mankbadi, and L. A. Povinelli

ICOMP, NASA Lewis Research Center, Cleveland, Ohio, USA

349-359

Identification of Thermodynamic Parameters that Induced Vibration and Noise in Varying Speed of Hermetic Reciprocating Compressor

N. H. Mostafa, and L. Mitchell

Virginia Polytechnic Institute, Blacksburg, Virginia, USA

360-369

Characteristics-Based Nonlinear Simulation of Reactive Silencers

K. A. Sallam, A. S. Sabry, M. A. Serag-Eldin, and M. A. Fouad

Cairo University, Cairo, EGYPT

370-385

Session S-10: Turbomachinery III

386

Monday, December 30, 1996

Chairs: H. Moustapha, W. Tabakoff

Overview of Jet Engine Performance Deterioration and Retention

W. Tabakoff

University of Cincinnati, Cincinnati, Ohio, USA

386-394

Advanced Design Concepts for High Pressure Turbines

S. H. Moustapha

Pratt & Whitney Canada Inc., Montreal, CANADA

395-402

Numerical Simulations of Fluidic Thrust Vectoring in a Two-Dimensional Converging-Diverging Nozzle <i>A. Hamed, and G. Laskowski</i> University of Cincinnati, Cincinnati, Ohio, USA	403-415
State-of-the-Art Cavitation Diagnostic Capability for Hydromechanical Systems <i>D. M. Hosny</i> Cummins Engine Company, Inc., Columbus, IN, USA	416-428
Volute Computations for a Refrigeration System <i>Y. T. Lee, T. W. Bein, and M. Tse</i> David Taylor Model Basin, Bethesda, MD, USA <i>P. A. Russel, and S. Abdallah</i> University of Cincinnati, Cincinnati, Ohio, USA	429-436
Session S-11: Turbulent Flows III	437
Monday, December 30, 1996 Chairs: M. Abou-Rayan, T. G. Keith	
Spray Characteristics of a Gas Turbine Research Nozzle with High Frequency Flow Modulations <i>M. Ibrahim</i> Cleveland State University, Cleveland, USA <i>T. Sanders</i> NASA Lewis Research Center, Cleveland, USA <i>D. Darling</i> Westinghouse Electric Corp., USA	437-438
Numerical and Experimental Study of Three-Dimensional Air Flow Characteristics in a Throttle Body <i>K-H Chen, D. DelSignore, and T. G. Keith</i> The University of Toledo, Ohio, USA	439-448
Flow Field Characteristics of a Turbulent Round Jet Subjected to Pulsed Vortex Generating Jets <i>N. H. Mostafa, V. Vandsburger, and T. A. Economides</i> Virginia Polytechnic Institute, Blacksburg, VA, USA	449-456
Experimental and Numerical Study of Turbulent Flow Drag Reduction using Surface V-Riblets <i>R. I. Afify, and M. F. Abd-Rabbo</i> University of Zagazig, Shoubra, EGYPT <i>M. A. Fouad, and A. M. Mobarak</i> Cairo University, Cairo, EGYPT	457-467
Turbulent Drag Reduction and Heat Transfer Enhancement Using Longitudinal V-Grooves <i>R. I. Afify</i> University of Zagazig, Shoubra, EGYPT	468-481

Session S-12: Aerodynamics

482

Monday, December 30, 1996

Chairs: S. A. Farag, S. Farokhi

Large Lift Fluctuations on a Low-Speed Airfoil near Stall

S. Farokhi, R. Taghavi, and G. Graf

University of Kansas, Lawrence, KS, USA

K. K. Wetzel

NeoEnergy Corp., Lawrence, KS, USA

482-485

Numerical Analysis of Supersonic Impinging Jet

S. Kitamura, and J. Iwamoto

Tokyo Denki University, Nishiki-Chou, Tokyo, JAPAN

486-494

Investigation of the Flow Dynamics on a Highly Pitched Delta Wing

M. A. Jarrah, and M. M. Abu-el-Rob

Jordan University of Science & Technology, Irbid, JORDAN

T. W. Abu-Arab

Cairo University, Cairo, EGYPT

495-500

Von Karman Vortex Shedding behind a Circular Cylinder

S. Goujon-Durand, P. Wang, and T. H. Nguyen

Dept. de Genie Mechanique, Ecole Polytechnique Montreal, Capus del
L'Universite de Montreal, Montreal, Quebec, CANADA

501-507

Experimental Measurements in a Conical Wall Jet

M. A. Jarrah, T. K. Aldos, and A. Al-Shorman

Jordan University of Science and Technology, Irbid, JORDAN

508-513

Session S-13: Aeroacoustics II

514

Monday, December 30, 1996

Chairs: H. M. Atassi, L. A. Povinelli

Inverse Problems in Aeroacoustics and Aerodynamics

H. M. Atassi

University of Notre Dame, Notre Dame, USA

S. Patrick Grace

Boston University, Boston, USA

W. K. Blake

David Taylor Model Basin, Bethesda, MD, USA

514-523

Linearized Euler Equations for Jet Noise Predictions

D. R. Hixon, S. Shih, R. Mankbadi, and L. Povinelli

NASA Lewis Research Center, Cleveland, Ohio, USA

524-533

Effect of Blade Load on the Aeroacoustic Characteristics of Axial Fans

S. Kouidri, F. Bakir, R. Noguera, and R. Rey

CNRS-URA 1504, LEMFI, ENSAM, Paris, FRANCE 534-544

[Analysis on Transonic Cascade Flutter of Turbomachinery in Combined Bending-Chordwise Translational Mode](#)

S. Kaji

University of Tokyo, Bunko-ku, Tokyo, JAPAN 545-553

Session S-14: Thermofluids I 554

Monday, December 30, 1996

Chairs: N. M. Raafat, A. Zebib

[Thermal Convection in a Magnetic Fluid](#)

A. Zebib

Rutgers University, Piscataway, NJ, USA 554-559

[A Numerical Analysis on the Heat Pipe Transient with the Random Heat Sources for Electronic Cooling](#)

H-K Noh, and K. S. Song

Electronic and Telecommunications Research Institute, Taejon, KOREA

M-H Park

Korea Power Engineering Company Inc., Seoul, KOREA 560-565

[Convective Fluid Motion in Trapezoidal Chamber with Heated Inclined Sides](#)

T. S. Lee

National University of Singapore, SINGAPORE 566-571

[Heat Transfer Measurements around a 180 Deg Turn in a Channel](#)

G. M. Carlomagno

University of Naples, Naples, ITALY 572-578

[Natural Convection within a Vertical Cavity Filled with Anisotropic Porous Medium](#)

G. Degan, and P. Vasseur

École Polytechnique, University of Montreal, Montreal, Quebec, CANADA

S. Goujon-Durand

Université de Paris XII, Val de Marne, Faculté de Sciences et Technologie,

Creteil, FRANCE

579-586

Session S-15: Stability and Transition I 587

Monday, December 30, 1996

Chairs: K. E. Hassen, J. T. C. Liu

[On the Effects of Longitudinal Vorticity Elements in Boundary Layer Heat and Mass Transfer](#)

J. T. C. Liu

Brown University, Providence, RI, USA 587-596

[Effect of Temperature Gradient on the Stability of Couette Flow](#)

- M. Meskine*
 Institut de Mécanique des Fluids, University del Louis Pasteur, Strasbourg, FRANCE
A. Lyazid
 IUT-IMF Université Louis Pasteur, Strasbourg, FRANCE 597-605
- Globally Subcritical Transition to Turbulence: The Plane Couette Flow Case**
S. Bottin, O. Dauchot, F. Daviaud, and P. Manneville
 Groupe Instabilités et Turbulence, Gif-sur Yvett, FRANCE
 LadHyx-Laboratoire d'Hydrodynamic, Ecole Polytechnique, Palaiseau, FRANCE 606-615
- Management of Boundary Layer Transition using the Spot Calming Region**
A. Seifert
 Tel-Aviv University, Ramat Aviv, ISRAEL 616-626
- Leading Edge Receptivity on Parabolic Bodies**
O. M. Haddad, and T. C. Corke
 Illinois Institute of Technology, Chicago, IL, USA 627-633

Session S-16: Workshop II - Energy and Environmental Trends in Egypt
 Monday, December 30, 1996

PANELISTS:

- H. E. Engineer *Maher Abaza* - Egyptian Minister of Electricity & Energy
 H. E. *Hamdy El-Bamby* - Egyptian Minister of Petroleum
 Prof. Dr. *Amin Moubarak* - Head of Congressional Committee on Industry and Energy

Session S-17: Thermofluids II **634**

Monday, December 30, 1996

Chairs: G. M. Homsy, S. M. Morcos

- Experimental Study of Buoyant-Thermocapillary Convection in a Rectangular Cavity**
M. Braunsfurth, and G. M. Homsy
 Stanford University, CA, USA 634-638
- Numerical and Experimental Investigations of Natural Convection in Inclined Air Enclosures**
S. M. Morcos, M. A. Abolfadl, M. A. Metwaly, and I. G. Girgis
 Cairo University, EGYPT 639-653
- An Investigation of the Effect of Fin Spacing and Working Fluids Properties on the Performance of a Heat Pipe Heat Exchanger (HPHE)**
R. M. Abdel-Aziz, M. H. Sakr, O. A. M. Mostafa, and M. F. Abd Rabbo
 Zagazig University, Shoubra, EGYPT 654-669
- An Erosion and Fatigue Resistant Thermal Spray Coating for Aircraft Engines**
J. Quets, and M. Naim
 Praxair Surface Technologies, Inc., Indianapolis, IN, USA 670-676

Thermodynamics Performance of Reactor Rod Bundle Following Loss of Offsite Power Transient

M. S. Khattab

Nuclear Research Center, EGYPT

677-683

Session S-18: Basic Fluid Dynamics

684

Monday, December 30, 1996

Chairs: S. S. Kossa, J. Iwamoto

Brownian Motion Revisited

F. Mainardi

Department of Physics, University of Bologna, Bologna, ITALY

F. Tampieri

Institute FISBAT-CNR, via Gobetti 101, Bologna, ITALY

684-693

Simulations of Systems for Hydraulic Transients

K. E. Hassan

Cairo University, Cairo, EGYPT

694-697

Shallow Water Waves and Korteweg de Vries Equation (Oceanographical Application)

M. A. Helal, and H. N. El-Eissa

Cairo University, Cairo, EGYPT

Riyad University, Riyad, SAUDI ARABIA

698-709

Derivation of Macroscale Partial Differential Equations in Fluid Dynamics

G. Pantelis

Australian Nuclear Science and Technology Organization, Menai, NSW, AUSTRALIA

710-718

Laminar Flow of a Non-Newtonian Yield-Pseudoplastic Fluid over an Axisymmetric Sudden Expansion

K. J. Hammad, G. C. Vradis, and M. V. Ötügen

Polytechnic University, Farmingdale, NY, USA

719-725

VOLUME III

Session S-19: Combustion

726

Tuesday, December 31, 1996

Chairs: M. El-Kotb, M. Kamel

Turbulent Partially Premixed Flames of Methane near Extinction in a Reverse Flow Reactor

M. S. Mansour

Cairo University, Cairo, EGYPT

R. W. Bilger

Sydney University, Sydney, AUSTRALIA <i>R. W. Dibble</i> University of California, USA	726-732
Effect of Downcomer Size on the Dynamic Behavior of the Drum Boiler <i>M. Ammar, and A. Khalil</i> Cairo University, EGYPT	733-740
Environmental Pollution Downwind a Free Transient Jet in a Cross Flow <i>H. A. Abouzeid</i> Sakr Factory, Arab Industrial Organization, Cairo, EGYPT	741-745
LINE Raman-Rayleigh-Lipf Measurements in Turbulent Partially Premixed Flames of Methane <i>M. S. Mansour</i> Cairo University, EGYPT <i>N. Peters</i> Institute for Technische Mechanik, Aachen, GERMANY <i>Y-C Chen</i> National Tsing-Hua University, Hsinchu, TAIWAN	746-752
Fuel Exposing due to Estrangement of Piping Nozzle Connection under Reactor Core <i>M. Khattab</i> Nuclear Research Center, EGYPT	753-760
Session S-20: Turbomachinery IV	761
Tuesday, December 31, 1996 Chairs: A. Hamed, M. G. Khalafallah	
Protection of Nickel-Based Superalloys from Erosion in Particulate Flows <i>V. Shanov, W. Tabakoff, and A. Hamed</i> University of Cincinnati, Cincinnati, Ohio, USA	761-770
Numerical Study of Drag Coefficient of an Infinite Cylinder at Low and Moderate Reynolds Numbers using the Fluent Code <i>B. Djebedjian, and J. P. Renaudeau</i> ESCPI-CNAM, Chaps Sur Marne, FRANCE <i>M. Giat</i> LEST, Université d'Evry, FRANCE	771-781
Session S-21: Stability and Unsteady Flows	782
Tuesday, December 31, 1996 Chairs: H. Salem, A. Seifret	
Early Stages of Impulsively Started Unsteady Laminar Flow past Square Cylinders <i>R. Tan, and T. S. Lee</i> National University of Singapore, SINGAPORE	782-787

<p>On the Higher-Order Accurate Schemes for Solving Two-Dimensional Unsteady Burgers' Equation <i>S. F. Radwan</i> University of Alexandria, Alexandria, EGYPT</p>	788-805
<p>An Experimental Device for Generating High Frequency Perturbations in Supersonic Wind Tunnels <i>K. J. Melcher, and M. B. Ibrahim</i> NASA Lewis Research Center, Cleveland, Ohio, USA</p>	806-817
<p>Session S-22: General I Tuesday, December 31, 1996 Chairs: G. Carlomagno, E. E. Khalil</p>	818
<p>Suction and Blowing Effect on the MHD Free and Forced Convection from a Horizontal Cylinder <i>T. K. Aldoss, and Y. D. Ali</i> Jordan University of Science and Technology, Irbid, JORDAN</p>	818-823
<p>Three-Dimensional Modeling of Flow Field in Aluminum Reduction Cells <i>A. K. H. Khalil, M. F. El-Demerdash, and E. E. Khalil</i> Cairo University, EGYPT</p>	824-833
<p>Experimental Investigation on an Oil Spill Recovery from Water Surface using Rotating Corrugated Discs <i>N. A. S. El-Minshawy</i> Suez Canal University, Port-Said, EGYPT</p>	834-848
<p>Natural Convection in a Porous Medium Coupled across an Impermeable Vertical Wall with Film Condensation <i>M. Mosaad</i> Mansoura University, Mansoura, EGYPT</p>	849-856
<p>Experimental Investigation of Turbulent Heat Transfer in an Annular Sector Duct <i>A. Y. Abdo, M. A. Rizk, A. S. Hanafi, A. S. El-Asfour</i> Cairo University, Cairo, EGYPT</p>	857-863
<p>Session S-23: General II Tuesday, December 31, 1996 Chairs: Y. T. Chew, M. A. Fouad</p>	864
<p>On Waste Water Treating Technology in Petroleum Industry, A Proposed Technique to Pronounce Effectiveness of Cross Flow Pack (CFP) Separators <i>M. A. Fouad, T. W. Abo-Arab, F. A. Kenaway, and M. E. Kandil</i> Cairo University & GUPCO CO., EGYPT</p>	864-872

Optimum Nose Coach Configuration of a High Speed Train for General Aerodynamic Performance <i>Y. Kohama, F. Horie, and T. Yoshikawa</i> Institute of Fluid Science, Tohoku University, Katahira, Sendai, JAPAN	873-877
Performance Characteristics of a Desiccant Air Conditioning System <i>S. Neti, and E. I. Wolfe</i> Lehigh University, Bethlehem, PA, USA	878-895
Session S-24: General II Tuesday, December 31, 1996 Chairs: M. Giat, H. Heikal	896
Prediction of the Atmospheric Flow near a HAWT <i>A. Serag-Eldin</i> Cairo University, EGYPT	896-907
Mathematical Field Modelling of Diesel Pool Fires in a Ship's Cabin <i>M. A. Yehia</i> Cairo University, EGYPT	908-922
